## You Are In Safe Hands

Just because we offer the very best rates does not mean we cut corners or are not professional. UPakWeShip is a division of EuroUSA Shipping which is part of The Euro Group. A large privately owned company which has been around since 1988 with an AAA financial rating, licensed, bonded, ISO Certified and members of B.A.R, I.A.M & Fedemac.

## Flexible Solutions For Your Moving Needs

### Why you will save money using UPakWeShip

UPakWeShip is the ONLY Company that specializes in International Self Pack Moving. All the moving companies make a lot of money by charging you a fortune to pack all your goods for you. For a small house this could easily be \$3,000. If you have the time and the incentive to save that \$3,000, invest in some good moving boxes and bubble wrap and pack everything yourself. There is no security breach in packing your own things, whatever a mover tells you. We get you to complete exactly the same paperwork for Customs as the mover would do. Our other money saving feature is the volume we ship. For example we are shipping over 100 small shipments to Europe every week and therefore always operate with full capacity on ships as well as on our trucks and we pass this cost efficiency on to our customers. None of the above cost savings though compromise our ability to provide first class customer service, reliability, honesty and professionalism.

### A Service for Everyone

Whether you are shipping one carton or a full household we have you covered. With 88 receiving terminals in the USA, 3 in Canada and more in Australia, New Zealand and Europe, you can drop off your boxes at the terminal and save yourself a collection charge or if that is not possible we can collect from your door. In the USA we have designed our own U Crates which are wooden crates that you can load your things into and then padlock them shut. A sure safe way for shipping valuables, breakables, electronics and small amounts of furniture. If you are wanting to ship a whole house load then our self load container service is a perfect solution for you.

Happy Moving Experiences FOR ALL !

Ship More For Less

## Technology

UPakWeShip is 95% paperless. We operate on a secure virtual cloud server with every customer having their own electronic file. Customers can track their shipment online as well as upload and download paperwork, customs forms, invoices and bills of lading. Everything we do in the office with you is on email and our customized database keeps track of everything neatly and efficiently. Of course if you ever need help, need a friendly voice to talk or vent to, advice on how to pack something or on completing a customs form, give us a call. That's one area where we have gone technology backwards! We actually answer the phones ourselves and you can speak to any of us without pressing a number and talking to a machine!

## Careers with the Euro Group

As a leader in the industry we are always interested in talking to people with International Moving expertise as well as expats who might be looking for a full or part time job as a relocation consultant. We also have some franchise opportunities available to the right candidates in some Countries. For more information please email [move@upakweship.com](mailto:move@upakweship.com)

## Insurance

We include some basic insurance free of charge for total loss but also check out our silver policy option. This not only covers you for total loss but also insures you against for example a carton going missing, a piece getting wet, a fork lift blade breaking your glass, a truck running over a piece or any other problem that was not caused by your packing.

## Our Web Site

Our web site [www.upakweship.com](http://www.upakweship.com) not only looks crisp and professional, it is full of very useful information. It was designed by us and not a web company and therefore has great pages like helpful hints on [packing and loading](#). The [picture gallery](#) shows our customers loading containers so you can see what to expect. We have [customs information](#) on just about every country, a [live chat](#) feature, [comments](#) from many customers, [customs forms](#) and paperwork to download, Real time [Tracking](#), [online booking](#), rates to our most [popular destinations](#), [contact](#) info for all our offices and a map showing where all of our [terminals](#) are located in the USA.

## Why we are #1

- The only company that specializes in Self Pack International Moving
- The only company to have designed and made its own lockable wood U Crates
- Own offices in most major markets around the world for door to door control
- Same ownership for 24 years.
- Financially strong, capable, professional and honest.
- Knowledgeable staff, many of whom have moved, lived and travelled overseas themselves.
- The best all inclusive prices
- Recommended by many expat sites, forums, schools, colleges, hospitals, international business and of course by word of mouth by thousands of happy shippers who have come back to us time and time again when it's time to move.

## Experience & Quality Control

The owners have worked in the International Moving business for over 30 years and have run The Euro Group for the last 24 years.

Many of the staff have worked or lived overseas and have therefore been through the whole moving process themselves. They know how to pack your precious piece of coral or crystal stemware or answer that question on your customs form. You'd be surprised at how many people in this profession have never looked inside a shipping container or ever seen a container ship ! That's not the case with the Euro Group.

Quality control is taken seriously here. We have our own training school in England as well as QC employees that visit moves randomly to check on everything from cleanliness of the crew, vehicle and equipment being used to neatness of paperwork, on time deliveries, interaction with the customer and quality of packing for those utilizing our packing services through the EuroUSA division.

Whilst we don't pretend to be perfect we really do try to keep everyone happy. Moving thousands of miles can have its challenges but we are here to minimize all the risks and if at any time problems arise, judge us by the time we take to sort things out, the experience and connections we have to get your move back on track. That's why we have so many repeat customers, a growth rate that's the envy of the moving and shipping industry, the best prices, great staff and thousands of successful moves under our belt, year after year.
